

Canyoning

Pack of 3 Canyoning tours on Majorca

- Biniaraix
- Gorg Blau – Sa fosca
- Mortitx

Torrent de Biniaraix

This torrent begins in the valley of the peak of l'Ofre and runs down the very well known canyon of Biniaraix. It gently slows down as it approaches the Sóller valley. It can be said that this torrent is short but "savage". It has a row of continuous jumps in the second half of the course and when there is plenty of water it turns into a quite technical torrent.

Duration: 5 hours

Level: Medium

Gorg Blau – Sa fosca

It is the "king" of the Majorcan torrents. This canyon unites water, length, unevenness and technique. There are walls more than 300 m high and at some points the gap is only about 35 cm wide. This karstic canyon has got the peculiarity to run through 400m of complete darkness. Therefore we need artificial light. The presence of water among the whole torrent increases the loss of body heat.

Duration: From 6 to 7 hours.

Level: Difficult

Mortitx

This torrent begins at the foot of the majestic peak of Tomir, but is only in the last part of the course where Mortitx descends. We will end up intimidated by the cliffs of the Majorcan Costa Brava, bringing us a specific sea breeze not comparable to any of the torrents on the mainland. The fund torrent has got a reputation for being really fun thanks to its multitude of waterfalls among its course.

Duration: From 5 to 6 hours

Nivel: Difficult

Requirements: Swimming knowledge, not suffer from vertigo, good physical condition and have earlier canyoning experience from at least 8 torrents levelled 3 or 4.
